

## ROUTINE CONSOLIDATION

For example, CTi will consolidate all your USA purchase orders in New York JFK Airport as flight availability is excellent from there to Europe / Russia, many times per week. Then released once, a lower shipment rate will be applicable.

Once we collect an order, you can see it on CTIX and you will also get a message via email from the CTIX system automatically. If status AOG, we will separate it from the Consolidation. CTIX will always show you online what the content currently is.
